

Timecard Punch

Yields: 6 drinks/pitcher, 25 drinks/punch bowl

Total time: 10 minutes

Every office party needs a little hooch in our opinion, and we've got a punch that really delivers. It's sweet enough to please everyone, but not too sweet to be off-putting. You're going to want to have a few of these (just not too many if you're driving or spending a lot of time with the bosses, unless that helps you out, of course). It combines things we love, beer, booze, some lemonade and some water to keep you hydrated. The combination makes something really light and refreshing and has enough of a bump to get you through the office party the right way.

Best served in a 16 oz cup.
